Education

University of Michigan, College of Engineering B.S.E. Expected: April 2026
B.S.E Computer Science, International Minor for Engineers

- **GPA:** 3.91 | **Programs**: Engineering Global Leadership Honors Program, Michigan Research & Discovery Scholars, Alpha Theta Delta Professional Design Fraternity
- **Awards:** Dean's List (5×), University Honors (5×)
- **Coursework:** Data Structures & Algorithms, Computer Organization, Theory of Computation, Discrete Mathematics, Linear Algebra, Operations Engineering & Analysis

Experience

University of Michigan Physics Department Ann Arbor, MI
Teaching Assistant, General Physics II *Aug. 2024 – Present*

- Provide instruction and tutoring in hands-on studio environments, supporting students in mastering key concepts
- Host office hours for additional guidance on assignments and coursework
- Lead exam review sessions on topics including electric fields, circuits, and magnetism

Science Learning Center Ann Arbor, MI
Study Group Instructor *April 2023 – May 2024*

- Facilitated weekly study group sessions for students enrolled Applied Honors Calculus II and General Physics I
- Prepared learning materials and coordinate meeting times to make study group accessible and valuable
- Fostered a collaborative, inclusive learning environment by encouraging active participation and open discussion

Mind Body Studies Academy Palo Alto, CA
Web Administrator *May 2023 – June 2024*

- Utilized advanced web development tools such as Elementor to craft visually appealing and responsive websites
- Managed marketing campaigns using the MailChimp email marketing platform to increase customer engagement
- Used effective communication skills to balance client demands and optimize business operations

Projects

Investigating Associations Between Green Spaces and Mental Health Outcomes *Sept. 2023 – Aug. 2024*
Institute for Social Research

- Independent research project under mentorship of epidemiology professor
- Collected census data to understand relationship between green space and public health outcomes in urban areas
- Performed statistical inference, produced regression models and effective visuals to derive actionable insights
- Presented findings at 36th Annual Conference of the International Society for Environmental Epidemiology (Aug. 2024)

Drones: Implementing Optimization Algorithms *April 2024*

- Implemented shortest-path algorithms to optimize drone delivery routes and network connectivity
- Developed recursive and dynamic programming approaches to solve complex routing problems
- Leveraged complex data structures to efficiently handle large datasets and streamline algorithm performance

Operational Definitions of Driving Performance Measures and Statistic *Sept. 2022 – May 2023*
University of Michigan Transportation Research Institute

- Standardized terms and measures in engineering to facilitate comparison of data for future researchers
- Conducted literature review of specific areas of automotive engineering using academic resources
- Synthesized findings of literature review into concise report containing definitions, figures, and reference data
- Presented results at the National Conference for Undergraduate Research in Eau Claire, WI (April 2023)

Artificial Intelligence Online Forum Categorizer *April 2023*

- Developed Naive Bayes classifier to categorize posts in online forums based on content
- Leveraged machine learning and natural language processing principles to improve categorization accuracy
- Employed recursion, binary trees, and comparators to train and test artificial intelligence models

Technical Skills

Languages: English (Native), Spanish (Native), French (Proficient)
Programming Languages: Python, Java, C/C++, R, HTML/CSS
Technologies: Adobe Suite, Elementor, Figma, Git, LaTeX, MailChimp, PowerBI
